### CALL FOR PAPER

## Special Session on the 2nd Workshop of WMSS 2018: Web Mining, Services and Security

**WMSS 2018** is dedicated to provide the opportunity for researchers to present their recent work on web mining, services and security. Both are important fields as they largely defined the Internet nowadays. The Web mining, services, and security technologies will redefine the way that companies do business and exchange information in twenty-first century. Ongoing issues in web mining, services, and security including performance of data mining in web, scalability, mobile adaptation, service integration, energy efficiency, and many others are still on the quest. On the other hand the security issues will always grow to preserve integrity with the new requirements that comes over the time. The major topics of interest for this special session include, but are not limited to:

**Web services architecture, Web usage mining, Web services discovery, Web services modeling, Web Content Mining, Web services performance, Web services security, Quality of service for Web services, Semantic Web, Mobile Services, Cloud Services & Security, Mining Web Data, Access and Usage Control, Semantic Web Mining, Cyber-physical Systems Security, Information Extraction, Distributed Systems Security, Personalization, Identity Management, Text Mining, Intrusion Tolerance and Recovery, XML, Malware Analysis and Mitigation, Webminers, Secure Data Streams, Web Security, Web Technology, Multifactors Authentication and Multimedia on Web.**

Proceedings of SCDM-2018 will be published in the renowned series of "**Advances in Intelligent Systems and Computing**" volume 549 by **Springer** \*\* Indexed by **ISI, DBLP, Ulrich's, Ei-Compendex, SCOPUS, Zentralblatt Math, MetaPress, Springerlink** \*\*.
